

Integral Skin Head Restraint

Woodbridge integral skin head restraints offer natural-looking, durable, Class A surface treatments over an adjustable firmness foam core in a one-piece design. Available in three treatment options, the integral skin process is an ideal solution for complex styling challenges. Further, the finished surface foam solutions are available in a wide variety of natural-looking surface treatments that can be texture and color matched for many applications.

Applications

- + Armrests
- + Grab handles
- + Head restraints

Advantages

- + Adjustable firmness
- + Texture and color matching
- + Lower cost alternative to wrapping - one-piece design offers natural looking Class A surface solutions for complex styling
- + Reduced BOM components depending on trim level in overall assembly
- + 1-Step process means no assembly required eliminating hand wrapping issues such as loose trim and seam alignment
