

Underhood Insulator

Ac
Acoustic

The Exterior Underhood Insulator product portfolio excels at acoustic control and thermal isolation while meeting the zero-burn requirement for underhood applications.

Products include:

- + Outer Dash Insulators (including Exterior Cowl Insulators)
- + Underhood/Engine Insulators

A combination of lightweight, high-performance materials is available to effectively control heat as well as Noise, Vibration and Harshness (NVH). The composite also meets V-0 fire-retardant specifications and offers a neat, finished appearance. Weights are tailored to specific application requirements.

Applications

- + Exterior systems

Advantages

- + Proven fire-retardant materials meeting V-0 specifications are available in a variety of grams-per-square-meter (g/m²) weights to provide the correct acoustic and thermal control for the application
- + The composite provides a neat aesthetic appearance
