

Cut & Sew

At Woodbridge, we provide a wide range of sewing techniques to create customizable looks that distinguish our customers' products.

Throughout the design phase, our 3D in-mold decoration method offers customers more freedom to customize trim and reduce costs. Our cutting capabilities allow us to maximize material and minimize scraps – all while creating close cuts that conform to extremely tight tolerances for a smooth, finished look.

When combined with our expertise, our cut & sew capabilities bring the smallest details in a product to life.

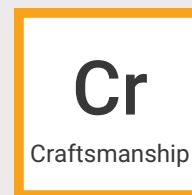

This product offering, combined with Woodbridge foam comfort and durability capabilities, provides a complete seating system solution.
