

Thin Profile Interior Foam Door Armrest Interior

Our thin profile interior foam helps complex, slim-profile interior door armrest components achieve new levels of fit, finish, and comfort. This high-resiliency, high-density foam can be supplied as a stand-alone component or as a finished trimmed assembly. We offer solutions that can eliminate steps in the finishing process including the gluing of foam to substrates with FIP.

Applications

- + Interior systems
- + Armrests
- + Door inserts
- + Instrument panel components
- + Center consoles
- + Grab handles

Advantages

- + Luxurious feel
- + Sleek design capabilities
- + Improved comfort
