

Interior Soft Trim Spacer Foams Interior

Woodbridge offers a multi-layered polyurethane foam core products are a low-cost alternative compared to spacer textiles in the market today. With a superior luxurious trim appearance, our spacer foam products offer a soft touch feel for cut and sew wrap interior trim applications such as instrument panels, door panels, and center consoles.

Our proprietary technology consists of two products:

- **A-Surface Trim + Spacer Foam** for synthetic leather cut and sew wrapped applications
- **Spacer Foam** for leather and hand-crafted cut and sew wrapped applications

Applications

- + Instrument Panels
- + Center Consoles
- + Door Panels

Advantages

- + Superior finished appearance
- + Repeatable performance
- + Sharp gap management
- + Harmonized craftsmanship

RELATED
SOLUTIONS

Interior Soft Trim Spacer Foams Interior

Advantages

- + High density polyurethane foam core for a superior soft touch feel
- + High indentation recovery for improved craftsmanship solutions
- + Lower-cost alternative to spacer textiles
- + Light weight
- + Suitable for drop-in replacement into existing cut and sew wrap processes
- + 2-way or 4-way stretch options tailored for each application
- + Ideal for 2-part adhesives systems using roll coat or spray adhesive processes
- + Promotes excellent bonds to a variety of raw materials and substrates
- + High strength composites allow for easy wrapping and repositioning
- + Ease of fabrication - die cut, Gerber cut, or laser cut
- + Solves loose fiber contamination commonly found with spacer textiles
- + Tight thickness processing tolerances
- + Available in 1.75mm+ thickness and 60" width
